

First-hand choice in second-hand attachments: more than **500** pieces in stock!

TVH likes to invest in **durability** and tries to pursue this as much as possible in its products. The **range of second-hand attachments** in original or completely revised condition is very **extensive** and **varied**: rotators, fork positioners, carpet booms, bale clamps, paper roll clamps ... Below you can find more info about the path a second-hand attachment follows at TVH.

Step 1

All products arrive at the warehouse in Waregem. We register the products by noting down the **brand, type, serial number, year of construction, capacity** We then assign a unique number to each attachment so that we can put the product in stock.

Step 2

We fit the products onto a lift truck to **check** the functioning. We steam-clean the product and check for wear, missing parts or other problems. In addition we also check the functioning of the attachment under load, by e.g. placing weight between the clamping arms; this also acts as a pressure-test.

Step 3

After the thorough inspection we decide whether we will sell the product "**as is**" or as a **reconditioned product**. If we opt for a complete overhaul, we will **disassemble** the attachment. Wear parts are replaced where necessary and each part is inspected individually for defects. If necessary we replace the ring gear, check the reduction of the rotating attachments, change the oil of the reducers ...

Step 4

After being reassembled and repaired, the attachments are again **tested** for their functioning and clamping pressure. A new layer of paint is applied as the finishing touch. If needed, we sandblast the attachment before painting it, so that the paint is applied on an even surface. Once the products have been completely overhauled, we take pictures to prepare them for sale. These devices are then placed on TVH-bay with all necessary details such as clamp thickness, own weight, horizontal centre of gravity, FEM-class ... and are then put back in stock in anticipation of sale.

Brands: Kaup, CAM System, Cascade, Bolzoni, Meyer, Auramo, Little Giant, ATIB ...

Obviously you are also always welcome in our **showroom** in the Brabantstraat 15 in Waregem to have a look at our second-hand attachments.
